

Workers' Compensation for Manufacturing

From metal production to paper products, plastics and electronics, manufacturing plays an integral role in our world - but the manufacturing industry can be high-risk. This creates a challenge for brokers to secure workers' comp insurance for clients that meets OSHA standards and protects employees.

Worldwide Facilities offers customized solutions for a broad range of manufacturing exposures, including those with high experience mods and high hazard classes. We focus on quality coverage to keep your clients' businesses and employees from being at risk.
